CAMMA Service Center

Thermo Fisher Scientific Center of Advanced Microscopy and Materials Analysis

CAMMA houses seven Thermo Fisher Scientific instruments, including the flagship Titan Themis microscope, which is capable of more than one-hundred million times magnification. Instruments in CAMMA allow researchers to see individual atoms, determine their arrangement, and measure their electrical and magnetic forces.

Standard Hourly Rates & Equipment Pricing:

	<i>Internal</i>				<i>External Non-Profit/Academic</i>				<i>External Corporate</i>
